TRAFFIC PROBLEM?

In order to speed up traffic leaving the West Parking Lot, students and staff proceeding South on King Edward Street should use the alternate route of: Caithness - Stevenson Road, Sherwin Road and via Dublin or Saskatchewan Avenue to King Edward Street.

See the diagram below. It is hoped that traffic flowing along this route will alleviate the congestion at King Edward Street and Notre Dame Avenue.

The same situation would apply for staff and students entering the West Parking Lot in the morning.
COMPLIMENTS AND APOLOGIES

You will have noticed the new masthead on this and the previous Bulletin. Our thanks to Bert Surtees in Advertising Art for producing this. We trust that he will not be angry with us when we ask him for another one after the Institute has its new name! A bouquet goes to Ed Scott in our Duplicating Department as well for pushing Bulletin No. 3 through on very short notice. Ed, by the way, has been promoted to Operator II and will assume responsibility for the expanded duplicating and mail services after the move to Building D.

Having said this, we wish to apologize for the somewhat poor technical aspects of our previous Bulletin. It was a rush job all around, marred by some poor print and misspelled words. A Government-owned typewriter that cannot even spell the Premier's name correctly should be investigated! Proof-reading of future Bulletins has now been added to our list of duties.

MOVING!

We have now received some word about moving into Building C (Administrative tower). The activity of finishing the central area is being stepped up and the Administration has decided that the furniture will start moving into the Tower on Monday, November 3rd. The deadline for the moving of all staff and offices slated for this area, including those from 1181 Portage Avenue, is November 15th, 1969. Any bets?

MORE PHONES

Chemical Lab. - number changed from 244 to 202
Chief Engineer - F. Massey - now installed 202
Head Caretaker - - now installed 359
Power House - - now installed 302
Learning Resources - Information - now installed 322

WELCOME OF NEW STAFF

Today we welcome some new people in the School of Commercial Studies,

Miss Valery Plumer: Instructor in Commercial Studies. Val was graduated from Moorhead State College in 1969, and has a B. Sc. degree with a major in Business Education. Previous to college, she was employed for five years in the Stenographic-secretarial field in Winnipeg, Fort Churchill, Flin Flon, and Victoria, B.C.

David N. Galavan: Instructor, Graphic Arts. He is a graduate of the Bolton St. College of Technology, School of Printing and Book Production, Dublin, Ireland, and holds a certificate in Final London City and Guilds. He arrived in Canada in 1967 and worked for two printing firms as compositor and sales representative, specializing in typography, before joining us.

Malcolm D. Paterson: Photographic Instructor in Advertising Art. Received his Bachelor of Professional Arts degree 'With Distinction' from the Art Center College of Design, Los Angeles, California, in 1963. He was the first Canadian graduate of the College to receive the 'Distinction' award. Prior to his professional studies, he was a photographer for CJLH-TV in Lethbridge, Alberta, for three years.

Upon Graduation, he worked under contract to the Saskatchewan Government in the production of TV documentaries and then opened an advertising and commercial studio in Vancouver, and later in Saskatoon. In both locations he serviced a number of large commercial firms and government departments. He has been active in several professional photographers' Associations and has won a number of awards. One of his showings was hung in the Canadian Pavilion at EXPO '67 and will also appear at the Canadian Pavilion at Osaka '70.

Mr. Funk: Instructor in Accounting. He is a C.A. and was employed as a Tax Auditor with the Provincial Sales Tax Department before joining our staff.
John F. Fitzgerald: Instructor in Commercial Studies. John holds a B.A. from University of Manitoba and a Permanent High School Teaching certificate. He spent three years with a local firm of Chartered Accountants and five years teaching high school in Kenora, Ontario, and St. James.

Alvin Raymond Barrett: Instructor of Accounting, Maths, Office Practice and Data Processing. He holds a C.A. Degree and has had some I.B.M. training in Computers. After graduation, he spent some time with I.B.M. as a sales trainee and more recently held the position of Assistant to the Comptroller at James Richardson and Sons, Ltd. He lists flying as one of his activities and holds membership in the Winnipeg Flying Club.

James Elmer Woronuk: Lab, Student Supervisor. Jim completed his high school education in Flin Flon and at the University of Winnipeg and has completed some courses towards an Arts degree. He is a 1969 graduate of our Photographic Technicians course. His work experience includes mining and photography in the Flin Flon area.

J. G. Balanduk: Instructor in Commercial Studies. Prior to joining our staff, he was employed by the Federal Government as a supervisor in the computer area. Over a period of 10 years, he has supervised a unit record installation, an IBM 360/20 system and a Honeywell 120 Tape system. He is presently completing his accounting studies for the R.T.A. designation.

COMPUTER SERVICES

As of October 29th, all the staff and instructors of the Computer Department are located in the new Centre in Building D. The phone number is 261 for everyone - just holler for the party you want!

Due to increased enrolments, we are not able to have a Student Work Area in the Centre at the present time. However, Room DPL-24, with six keypunches, is open for student use; there is also a keypunch available for Technology in Building A. (Students are requested to keep these areas tidy.) Staff may use these machines and also one available in the Unit Record room in the Centre.

Unfortunately the turn around time for keypunching student programs has lengthened to about a week due to the large initial influx. Steps are being taken to reduce the time to the normal 48 hours. Additional help will be joining us in the near future. Our apologies.

The School of Business instructors are making good use of the exam marking system. Although set up for multiple choice, it can be adapted easily for true-false as well. Further plans include a better item analysis of each question. Any suggestions regarding this (or any other) program will be welcomed. For further information see Merv Miles at the Centre or Allan Alford in the School of Business.

Another program of interest is MARKFIN. Developed by Louis Rodkin, it is a program to calculate final marks. Please see him for further details.

The Computer Centre will be glad to arrange tours for interested groups. Our motto is SERVICE - so ask us!

OVERHEARD IN THE COMPUTER CENTRE

A programmer's definition of time sharing: making love to your girl friend and debugging the payroll program simultaneously.

Dr. A.D. Booth recently referred to an incident in which a Soviet electronic computer designed to translate English into Russian dealt with the phrase "out of sight, out of mind." As it happened, an American Computer geared to translate Russian into English picked up the Russian translation and rendered it back again as "invislable lunatic". (Quoted in 'The Science Myth' by Magnus Pyke.)

On the subject of automation, I must proceed as the porcupine is said to make love - very carefully..."

We read about the pros and cons of computer assisted instruction (C.A.I.): "From the wonderful teaching machine
The king, from reports I have seen,
Gets his sex education,
The best in the nation
With no trouble at all to the queen."
